

## DeLaRue Bill Dispenser

### Example of Properly inserted Bill Cassette

A *properly* inserted Bill Cassette will have its handle align with the inside of the beveled black edge of the Bill Dispenser Housing

A good test is to place a straight edge from the bottom metal pan of the Bill Dispenser to the top of the Note Transport as shown. The Bill Cassette Handle should protrude out enough to prevent the straight edge from touching top to bottom

### Example of an improperly inserted cassette

An *improperly* inserted Bill Cassette will have its handle out past the inside of the beveled black edge of the Bill Dispenser Housing by approximately  $\frac{1}{2}$  inch
