Variable Frequency Drive Panel (VFD)

Reduce operating costs and improve wash results with a custom-built VFD for your site.
VFD FEATURES & BENEFITS

- VFD allows for direct computer control of RPM.
- Provides real-time control and monitoring of equipment.
- Touchscreen interface for ease of programming VFD configuration.
- Ethernet ready for:
  - Remote connectivity
  - Monitoring capability
  - Simplified wiring and installation
- A/C controls temperature and humidity.
- Meets IEEE 519 standards.
- Just Plug It In – reducing installation time.
- Smarter pumps and hydraulics improve performance and reduce cost.
- Site-specific noise suppression.
- Reduces installation time.
- Saves on installation costs.
- Ensures separation of circuits.
- VFDs limit operating RPM, saving usage as the RPM adjusts to specific parts of a vehicle.
- Limit inrush to save on power.
- ETL Listed.

REQUIREMENTS & SPECIFICATIONS

- Customized per job.
