

# WashCloud

## A centralized cloud platform

Enable operators and distributors to control and monitor next-generation vehicle wash equipment via web and mobile applications.

- **Monitor the health of your business.** View real time network dashboards and reports to understand performance across all sites at a glance.
- **Benchmark against industry performance.** Compare your sites to industry and regional trends to see how you're performing relative to the market.
- **Turn site data into targeted marketing.** Use site level statistics and customer insights to create targeted campaigns that drive engagement and growth.
- **Leverage predictive and AI driven insights.** Identify patterns, risks, and opportunities through advanced and AI powered analytics based on site behavior.
- **Drill down to root cause and take action.** Use detailed analytics and breakdown charts to move from high level metrics to actionable insights quickly.
